Preventive Care Guidelines Now Available Online for Employees and Dependents Covered by the Baylor Scott & White Health Medical Plan

Your BSW Health benefits plan encourages preventive care and maintenance of good health. The plan covers a set of preventive services — such as routine check-ups, immunizations, and screening tests — at no cost to you. When delivered by network providers and billed as “preventive care,” these services are free and **not** subject to deductible, copays, or coinsurance. Covered preventive care services and guidelines for adults, women, and children are now available online at: <http://bswh.swhp.org/health-and-wellness-programs>.

Note: Physicals/annual wellness visits are covered **once per calendar year**.
